

7notes For Kindle Fire 1.3.2 Released - Update Adds Backup and PDF Export Features

MetaMoJi Corporation is proud to announce the latest update to 7notes Premium for Kindle Fire. The updated version (1.3.2) includes backup functions and the ability to export notes as PDF files.

Tokyo, Japan ([PRWEB](#)) July 09, 2012 -- MetaMoJi Corporation is proud to announce the latest update to 7notes Premium for Kindle Fire. The updated version (1.3.2) includes backup functions and the ability to export notes as PDF files.

7notes Premium is the smart writing tool for the Kindle Fire. With its state-of-the-art handwriting recognition engine 7notes provides users with a superior note taking experience, removing the reliance on the software keyboard. Common scenarios include taking notes during a telephone call, while attending lectures, when meeting with customers, and while commuting.

The update delivers features requested by Kindle Fire customers, including:

- Send a note as an e-mail attachment in PDF format
- Save a note in PDF format to local storage
- Load a text document from local storage
- Use a backup file to save and restore notes

MetaMoJi released the first version of 7notes Premium for Kindle Fire at the end of 2011. This addition to the 7notes family delivered the same ease and benefits to Kindle Fire users that iPad and iPhone users had been exclusively experiencing.

7notes has seven core benefits:

1. Start taking notes without delay; edit and decorate text as required at a later time.
2. Handwrite notes and then convert them into text at a later time.
3. A state-of-the-art prediction engine makes users more productive.
4. Handwriting makes it fun to write and to express feelings, with various input support features.
5. Post to external networks such as Facebook and Twitter, and store at services such as Evernote and Dropbox, with smart handling of text and images.
6. Create interactive documents through the "Edit it" Server and share with other 7notes users
7. Create visual documents with notes that contain images and web content, alongside handwritten and font based text.

7notes for Kindle Fire is now available for download in the Amazon App Store for the introductory price of \$0.99: <http://www.amazon.com/Smart-Writing-Tool-7notes-Premium/dp/B006RMJ1I2>.

7notes is also available for the iPhone and iPad, and Android devices via the Apple App Store, Google Play, and the Samsung Apps market-place.
