

7notes With Mazec For Android Now Available From Samsung Apps

MetaMoJi Corporation proudly announces the availability of its popular note-taking app, 7notes with Mazec for Android, from the Samsung Apps marketplace.

Tokyo, Japan ([PRWEB](#)) June 13, 2012 -- MetaMoJi Corporation proudly announces the availability of its popular note-taking app 7notes with Mazec for Android from the Samsung Apps marketplace.

Samsung Apps is an online marketplace that provides carefully selected mobile applications for Samsung mobile phones. The addition of 7notes with Mazec to Samsung Apps will allow even more Samsung mobile users to experience the freedom of handwriting recognition on their devices.

MetaMoJi CEO Kaz Ukigawa believes that 7notes with Mazec for Android delivers exceptional value for money to users of Samsung devices that are frustrated with the standard keyboard entry modes, and would like a more exciting and creative experience delivered through their mobile phones. The placement on Samsung Apps is in succession to bundling the 7notes Mazec technology along with the Galaxy Note in Japan.

The addition of 7notes to the Samsung Apps marketplace follows on from the successful release in March 2012 to the Google Play market. 7notes with Mazec for Android allows users to mix handwriting recognition directly into the standard Android experience, removing the need for the software keyboard. The Mazec integration enables users to take notes quickly and simply in a wide variety of situations. Common scenarios include taking notes during a telephone call, while attending lectures, when meeting with customers, and while commuting. 7notes allows users to easily export notes to e-mail, Facebook, Twitter, and other note applications such as Evernote.

7notes with Mazec for Android is now available for [immediate download](#) from Samsung Apps at the introductory price of \$0.99.

Current information about the available Samsung's devices can be accessed from the MetaMoJi website at: http://product.metamoji.com/en/samsung/available_devices_for_7notes.htm
