

This is How You Should Take Notes

7knowledge releases a new version of Note Taking iPhone(/iPad) app called 7notes

San Francisco, California ([PRWEB](#)) August 17, 2011 -- 7knowledge Corporation, an innovative productivity application developer, has released an updated version of 7notes, the note taking application for iPhone, which is now available in the Apple App store. 7notes allows the user to mix their handwriting and digital texts so you can take notes in business meetings faster and easier. A premium version of [7notes](#) has a converter that allows you to convert your writing into digital.

The new version has an enhanced Facebook connection capability by specifying the target of the posting to Friend's wall, Fan/Group Wall, 7notes Wall in addition to the user's wall.

7notes's seven benefits:

1. Take notes now, convert them to text later
2. State-of-the-art features to enhance note taking such as an alternative display with a predictive text engine
3. Post and mail notes by extracting text and images
4. Post to Facebook, Twitter and store at Evernote, Dropbox and other services
5. Social writing with "Edit it" Server
6. Mark and alarm for reusing notes later

7notes uses a proprietary state-of-the-art handwriting recognition software developed by their worldwide expert team. 7notes allows users to take notes on the go with your fingers or a pen for the iPad. The system automatically recognizes handwriting and records it. Users can save them into different memo documents as well as connect to DropBox and Evernote.

Handwritten notes and symbols can be entered directly onto digitally typed text documents. 7notes allows the user to set styles of your writing including weight of stroke, size, color, etc. Users can switch between Handwriting and Keyboard entry with a single touch. 7notes allows you to sketch ideas, organize thoughts and share easily by just plugging in a VGA adapter into your iPad and display them in real-time on any projector or display.

Standard features include simple note taking features, built-in Spell Checker, autocorrect and auto-completion and PDF Document Creation.

“The mobile landscape has change the way we interact with these devices and the places we use them. These devices must encourage natural human interaction”
says Kaz Ukigawa, President / CEO of 7knowledge. “Our Apps allows humans to communicate and express themselves in the digital world more naturally”

This app is downloadable in the iPad App Store or the iPhone App Store.
