

Note Anytime Enterprise Edition Now Available For Windows 8

MetaMoJi Corporation announce the Enterprise Edition (EE) of their popular note taking application Note Anytime. The new release gives organizations the option to deploy on a large scale without using the Windows Store.

Tokyo ([PRWEB](#)) March 01, 2013 -- MetaMoJi Corporation, the leading productivity application developer for tablet and smart-phone devices, announces the Enterprise Edition of their popular note taking and PDF annotation app “Note Anytime”.

Note Anytime Enterprise Edition (EE) has been optimized for deployment within a corporate environment by removing the need to access to the Windows Store and the MetaMoJi “Digital Cabinet” cloud service. Note Anytime EE includes a number of premium features including advanced inks and handwriting recognition for the supported language of their choice.

Note Anytime enables users to capture stylish notes, combining handwritten and typed text with photographs, illustrations, and web-content on various paper styles. Note Anytime is unique in its ability to scale, rotate, and edit any content after creation. This gives note-takers the flexibility to adapt their note-taking as the situation requires without the need to erase and start again. Note Anytime is available on many platforms including Windows 8, Windows 8 RT, and iOS, with an Android edition due for release in early 2013. The universal nature of Note Anytime allows users to work on their notes across multiple devices, with the same user-experience and capabilities available on each.

Note Anytime can quickly import existing PDF documents for annotation. A user can add handwriting, digital text, images, and more to the imported document. Once created, documents can be shared with other Note Anytime users or exported as a new PDF file. These features make signing and annotating standard business documents such as Non-Disclosure agreements, or reviewing and annotating documents while on the move, faster by enabling a purely digital process. Another powerful use is storing manuals, reports, and e-text books with personal annotations that can be updated at any time.
